

# Colourlight

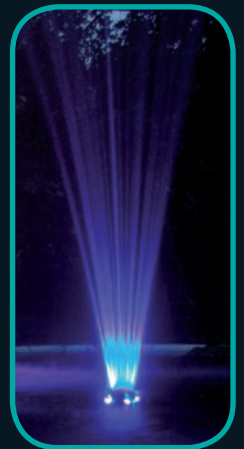

Lighting can be so much more than the production of lightness. Go new ways. Take color into the darkness, and make light an experience. Colored light.

bocom develops and produces a wide range of products that create and control colored light: state-of-the-art LED colored light sources for the most various purposes and conventional colored light tube technology for particular tasks. With the help of bocom control dynamic color cycles can be realized simply and reliably.

You will find our colored light technology in architecture, stage lighting, in living areas, at fairs and events, in lamps or lights and many other appliances as well as in creative and artistic light objects.

## Fountain beam

ColorPIX fountain beam 18/36

Colored light emphasizes effectively the visual effect of lighted fountains.

The colored light creates attention and interest because of the play of colors in the lighted object.

Bocom's special LED beams surround the pumpjets and light the fountains centrally with colored light.

The programmable control unit takes care of soft color changes and synchronizes if required.
